## Potting Competition

### *Task description and pictogram*

#### **1. Time and division of labor**

You have 25 minutes to complete this task.

All 3 team members must participate in the task.

Subtasks may be completed simultaneously.

#### **2. Task**

The aim is to pot as many young plants as possible by hand, place them in the greenhouse, and water them.

Each team has a work table at its disposal. The substrate must be shoveled from the pile of soil onto the work table. Pots are available in large Euro crates. All other materials required for the task are located directly at the table.

The potted plants must be placed pot by pot on a table in the greenhouse, watered, and labeled.

The team that has potted and placed the most plants receives the most points. Additional points are awarded for clean, tidy execution and proper, precise work. Points are also awarded for how well you work together as a team.

From a horticultural point of view, the plants must be potted and arranged in such a way that they can continue to grow without any problems. Otherwise, these plants will not be included in the total score.

At the end, the work area must be left tidy. The remaining substrate must be shoveled back onto the pile of soil
